### *Confidentiality notice*

This document contains commercial-in-confidence information. Recipients and users of this document agree to hold the information presented within as confidential and agree not to disclose, or allow the disclosure, of this information to any other party, unless authorised, except to the extent required by law.

### *Statement of capacity*

4Pillars is an independent, professional consulting firm, providing expert advice on environmental matters to clients from a range of business sectors. This document has been approved by a certified environmental practitioner (CEnvP), with extensive experience in environmental management, impact assessment, monitoring, sampling and analysis. The performance and professional integrity of CEnvPs are independently verified by the Environment Institute of Australia and New Zealand ([www.cenvp.org](http://www.cenvp.org)). For further information, please visit [www.4Pillars.com.au](http://www.4Pillars.com.au).

### *Acknowledgement of Country*

4Pillars acknowledges the Traditional Owners of the land on which this site is located, the people of the Gundungurra and Tharawal Nation. We acknowledge their continuing connection to land and sea Country, and we pay our respects to their Elders past, present and emerging.

### Disclosure statement

This document has been prepared by 4Pillars in their capacity as independent environmental professionals. The statements and conclusions of this document are based on an objective evaluation of the available facts and data.

No incentive or deterrence has been proffered to 4Pillars, any employee or shareholder of 4Pillars in relation to reaching a particular conclusion or achieving a particular outcome in relation to this matter.

### Declaration and limitations of this document

To the best of our knowledge and (in part) based on information provided to us by the client or their representatives, the information contained in this document is accurate at the date of issue. Where feasible, 4Pillars has verified the accuracy of information provided to us by the client or their representatives. To the best of our knowledge, no statement or material in this document is false or intentionally misleading.

In carrying out this assessment and preparing this report, 4Pillars has used a degree of care and skill ordinarily exercised in environmental impact assessments by reputable members of the environmental profession in Australia.

No other warranty, expressed or implied, is made or intended. The opinions and judgements expressed in this report should not be construed as legal opinions or advice. 4Pillars is also not responsible or liable for any third-Party use or reliance on this report.

Enquiries and requests for further information should be directed to 4Pillars via [hello@4Pillars.com.au](mailto:hello@4Pillars.com.au).

## 1. Introduction and background

### 1.1 Objectives and scope of work

4Pillars Environmental Consulting Pty Ltd (4Pillars) was engaged by Bowral Waste Centre Pty Ltd (BWC or the Licensee) to conduct landfill gas monitoring for the property located at 8 Kiama Street, Bowral, NSW 2576 (the Site) to ensure compliance with Environment Protection Licence (EPL) 13366 issued by the NSW Environment Protection Authority (NSW EPA).

4Pillars' scope of work was as follows:

- measure landfill gas accumulation, in accordance with licence requirements;
- assess data against relevant licence limits (where they exist); and
- prepare the monitoring report (this report).

### 1.2 Site details and monitoring requirements

The subject Site is 8 Kiama Street, Bowral, NSW 2576 which sits on five cadastral lots. The landfill site consists of three cadastral lots- Lot 13 DP 1022146, Lot 32 DP 1275078 and Lot 40 DP 1307181, which is located within the Wingecarribee Shire local government area (LGA) and falls within the E4 (General Industrial) and RU4 (Primary Production Small Lots) land zoning under the Wingecarribee Local Environmental Plan 2010. Surrounding land zoning includes E4 (General Industrial), SP2 (Rail Infrastructure), R3 and R2 (Medium and Low Density Residential), RU4 (primary production small lots) and RE1 (Public Recreation). The majority of the surrounding land uses are residential, agricultural or industrial (including horticulture, landscaping supply, self-contained storage, car repairs, etc.). The nearest residential area is medium density and occurs immediately to the east of the Site, along Railway Parade. Residential and business receivers are located to the east and west of the Site (refer Figure 1).

The landfill licence was transferred to Bowral Waste Centre Pty Ltd (the Licensee) in July 2019. The Site was not operational under the Licensee until November 2019. Since the commencement of operations under the current Licensee, the Site progressively reached full scale of operations in February 2020.

As noted above, the Site is subject to EPL 13366 (the EPL). Conditions P1.1 and M2.2 of the EPL require landfill gas (methane- CH<sub>4</sub>) to be monitored every six months in two locations;

1. Above where intermediate or final cover has been placed (EPL point 9); and
2. inside all buildings within 250 m of deposited waste (EPL point 10).

Conditions R2.3 and R2.4 of the EPL detail notification requirements if methane is detected above 500 ppm (v/v) (surface gas monitoring), or above 1% (v/v) (gas accumulation monitoring).

### 1.3 Licence year

The monitoring undertaken on 22 July 2026 falls into the 2026-27 reporting period, from 11 May 2026 to 10 May 2027.

## 2. Monitoring methodology

Where relevant, the sampling and analysis program was undertaken in accordance with the NSW EPA *Environmental Guidelines: Solid Waste Landfills (2016)* and in accordance with the Site Landfill Environmental Management Plan (LEMP).

### 2.1 Monitoring

Neither intermediate nor final cover was placed in the landfill on the day of monitoring; therefore, landfill gas measurements were not taken on the active cell. As per the Site's EPL, the measurement of methane in buildings within 250 m of deposited waste (see Figure 1) was undertaken.

Attended landfill gas monitoring was carried out on 22 July 2026 by two competent and experienced personnel of 4Pillars (Ms. Manikshya Shrestha and Ms. Laura Kent) using a portable gas analyser (see details below). Accumulated landfill gas measurements were taken inside residences and businesses on Alcorn Street, Belmore Street, Carrington Street, Funston Street, Kiama Street, Loftus Street, Moss Vale Road, Oxley Hill Road, and Railway Parade. All buildings were approached, but not all were accessible on the day of sampling, either because the occupant did not allow access, or was not present. Where measurements were possible, they were taken within the first enclosed space encountered inside the door of the property (generally the living room or hallway). A total of 67 individual readings were obtained.

## 2.2 Description of Gas Analyser

A calibrated Geotech GA5000 portable landfill and contaminated land gas analyser was used for the monitoring. The GA5000 unit measures methane gas and has a range of 0%-100% (v/v) with typical accuracy of  $\pm 0.5\%$  (vol) at 0-70% methane and  $\pm 1.5\%$  (vol) at 70-100% methane. The GA5000 unit is suitable for the monitoring requirements of the EPL.

## 3. Results and discussion

### 3.1 Landfill gas

Tabulated accumulated landfill gas measurements for each of the accessible residences are provided in Appendix 2. Measurements in all buildings returned a value of 0.0 % v/v methane. Therefore, no methane accumulation was identified in any structures within 250 m of the landfill, indicating that the Site was below the threshold specified in Condition R2.4 of EPL 13366. As such, no notifications were required.

## 4. Conclusion

### 4.1 Compliance

The result of the attended landfill gas monitoring indicate that the Site is compliant with its legal obligations related to landfill gas management.

### 4.2 Limitations of this assessment

To the best of our knowledge and based on information provided to us by the client or their representatives, the information contained in this report is accurate at the date of issue. 4Pillars has used a degree of care and skill ordinarily exercised in similar investigations by reputable members of the environmental sector in Australia. No other warranty, expressed or implied, is made or intended. The opinions and judgements expressed in this report should not be construed as legal opinions or advice. 4Pillars is also not responsible or liable for any third-Party use or reliance on this report.

## 5. List of appendices

Appendix 1. Figures

Appendix 2. Gas Accumulation Monitoring

Figure 1: Site boundary, surrounding land zoning and 250 m radius from the approximate area of deposited waste.

## Appendix 2 Gas Accumulation Monitoring

Table 1: Accumulated gas monitoring results obtained from buildings within 250 m of the area of deposited waste.
